WebUntis as platform

Easily integrate your application into WebUntis

Schools are always up-to-date with WebUntis. It is so easy to stay in control and you gain more time for more important tasks in your everyday school life. It is now so easy to integrate third-party applications into WebUntis.

For more information, visit our website untis.at/webuntis-als-plattform

It is so easy to integrate any system

•	Ihre Applikation Bescheebung as thee Applikation.	
\$	Applikation 2 Color Nobility for Schülertowen	
8	Applikation 3 Johnpolet & Schlerferen	
	Applikation 4 Longenterlagen für Schüler*innen zur Pröfungsverkenning	

Advantages

- One registration for different applications: Single sign- on (via OIDC)
- Data exchange in the background (OneRoster standard)
- All applications at one glance: Integration into user surface (of WebUntis)
- WebUntis therefore provides you with the possibility to access many different features and applications that are useful for your everyday school life by only logging in once.
- WebUntis meets all standards and requirements contributing to the data protection of all providers.

Untis 2022 - Release notes

The release notes contain brief general descriptions of improvements and new features. Additional information and details for setup, tips for facilitating getting started and hints about established methods can be read in our release notes, as usual.

They are available as PDF documents and online. As soon as new features are available, they will be added, i.e. you can look up anything more than once.

Untis + WebUntis as overall solution for timetable scheduling, lessons and school communication

Due to the growing challenges in digital everyday school life / home schooling, we have once again in particular expanded WebUntis' communication features. In addition to Untis Messenger, the expanded WebUntis messaging system is now also available, which provides an easy possibility for communicating with parents/ legal guardians. Test WebUntis now and free of charge, and see for yourself how WebUntis supports you in your everyday school life.

Loslegen mit WebUntis

Among other things, Untis now has improved features for timetabling (diagnosis, suggested swaps), and we implemented a lesson window across terms, a requirement that has often been requested.

Test WebUntis now, free of charge, and see for yourself how WebUntis supports you in your everyday school life.

Ċ

The ideal school communication

Easy and quick communication with everybody involved

Communication with students, teachers and parents/legal guardians

Everyone on the same page

WebUntis and Untis Messenger help to facilitate communication between teachers, students and parents/legal guardians. The entire communication about school can, for instance, be done via your smartphone, and with Untis Mobile you always have the up-dated timetable at hand.

Your advantages

- Up-dated timetable at hand, always
- Reach out to all parents/legal guardians easily and directly
- Integrated chat app: The secure alternative to WhatsApp
- Compliant with data protection rules in accordance with the GDPR

For more information, visit our website: **untis.at**

It is so easy to get in contact with all parents at once

The basic features in WebUntis and in the Untis Mobile app are particularly clear and well-structured, and have been developed especially for the needs of communication with parents.

WebUntis messages can quickly and easily be sent including attachments:

Letters to parents, important announcements and more

You can send important messages to only one parent or to all parents: The annoying and time-consuming distribution and collection during your lessons is no longer necessary. Teachers do not need to worry about that anymore and can concentrate on the important aspects of their profession.

Push messages Whenever there's news, yes

Whenever there's news, you will get it as a push message on your smartphone.

• Read receipts

You instantly get feedback on who has already read your message.

Untis: new features

New design of the context menu - more usability

We reviewed the context menu to make it "fast and clear-structured". In the timetable mode, it is now possible to quickly open master data, lesson and timetable windows with a right-click.

Taught classes at a glance

Do you want to quickly have a good overview of all the classes a teacher teaches? This field is now available in the teacher master data window.

More precise diagnosis

In the Version 2022, diagnosis has been improved in the areas "Subject twice a day", and "Double period constraints".

New mode in lesson window

The lesson window has been expanded by the School year overview in order to make a better overview of teacher deployment across all periods.

More functions in Untis Express

Due to customer requests, the time grid has been developed in such a way that from now on you can plan and schedule from period 0 onwards. Additionally, you can enter the class teacher, and can use terms and break supervisions without the "Cover planning" module.

Many features in the student group window

A lot of new and useful features have been added to the student group window, e.g. lesson and substitution numbers, or the possibility to delete unused student groups.

The new .untis file format

The development of the new .untis file format facilitates work significantly, in particular with regional data.

All improvements and new features are here: untis.at/2022

WebUntis: new features

Working intuitively with the new design

WebUntis 2021 shows comprehensive changes in the surface design for all users. We wanted to improve usability much more, and therefore redesigned navigation, period details and the class register.

Easy communication with parents

You now can quickly and easily send messages and attach files with WebUntis messages. This messaging system has been adjusted in particular to the workflow between parents and the school. Features such as push messages and read receipts now make the messaging system complete.

The solution for distance learning

In order to easily integrate online teaching at schools into the WebUntis timetable, you now have the possibility to hold lessons online. Students can take part in the video conference via their timetable.

Quickly done - online timetable scheduling!

WebUntis timetable scheduling has a new user interface, and new features were added. The new design makes online timetable scheduling clearer and easier. The improved optimisation can now calculate more complex timetables as well.

WebUntis platform

With its new integration possibilities, WebUntis as a platform now provides the possibility to access many different features and applications useful for your everyday school life by only logging in once.

All improvements and new features are here: untis.at/2022
